

Description

The material

Datasheet only intended for use with the Eco-Audit tool, not for general information.

Primary material production: energy, CO2 and water

Embodied energy, primary production	2.17e4	-	2.54e4	kcal/lb
CO2 footprint, primary production	15	-	17.6	lb/lb

Material recycling: energy, CO2 and recycle fraction

Recycle	✓			
Embodied energy, recycling	932	-	1.03e3	kcal/lb
CO2 footprint, recycling	0.54	-	0.59	lb/lb
Recycle fraction in current supply	68.8	-	76.1	%
Downcycle	✓			
Combust for energy recovery	✗			
Landfill	✓			
Biodegrade	✗			
A renewable resource?	✗
